## 2. OPEN TRANSMISSION RACK

Dinesh Microwaves and Electronics manufacturers of open transmission rack is ideal for use in Telecom/carrier network, city networks as well as industrial networking for maximum feasibility.

Ports can be interconnected on the rack with connectors or through one-sided splicing. The rack's open design allows components installation from all sides and permanent open access for service or repair work. The rack's convenience with a simple and robust design that furthermore saves space and costs. All racks also feature an earthing kit point as standard equipment. The 19" inches rack can be assembled in any individual height or depth and can be lined up side and joined together firmly, back to back mounting is also possible.

The rack accommodates active and passive components like patch panels. Its open design allows equipment – generated heat to quickly dissipate.

1. 4 leveling feet and 4 mounting brackets.
2. Cable mounting rails for flexible hoses.
3. Hexagon socket wrench.
4. Fastening materials.
5. 4 crossbars length 300mm or 600mm to joint front or rear walls.
6. Mounting rails of approx 480mm length
7. 2 mounting brackets with bolts
8. Fully mounted basic frame.
9. Tube cabling to patch panels.
10. Fully assembled basic steel frame
11. 19 inches vertical steel front profiles
12. Cable guides for outdoor cables
13. Side patch cord guides
14. Integral rear panel
15. Small overall dimension
16. Controlled bedding radii
17. Patch cords free to strain
18. Specified radius limited cable routing
19. High packing density of upto 960 fibres (40U)
20. Can be designed as per customer requirements.
